PROFESSIONAL SUMMARY

Full-Stack MERN / PERN Developer (1.6 yrs) who ships production SaaS end-to-end auth systems (JWT/OAuth), payment webhooks, REST APIs, and cloud deployments. Two live products with real users, including a custom MCP server connecting AI assistants to live app data. Strong on security patterns and concurrency-safe backend design.

SKILLS

Frontend: React | Redux Toolkit | RTK Query | Tailwind CSS

Backend: Node | Express | REST APIs | JWT Auth | OAuth 2.0 | Socket.io | Middleware Architecture

Database: MongoDB | PostgreSQL

Language: JavaScript | TypeScript

Tools: Git | GitHub | Vercel | Render | MongoDB Atlas | Postman

PROFESSIONAL EXPERIENCE

Full Stack Developer

Jan 2025 – Present | Tiruppur, TN

AV7 SCM (The SCM Silks)

- Built 20+ production React modules (Redux Toolkit) for an internal ERP serving 500+ employees cut page load time 25% via render optimization and state restructuring.
- Engineered a reusable React component library adopted by 3 teams, cutting duplicate code ~30% and feature delivery time by 2–3 days per sprint.
- Debugged and stabilized business-critical JavaScript modules fixed scope-leakage and event-handling defects impacting 500+ daily users.
- Integrated REST APIs across ERP modules and optimized SQL queries behind high-traffic reports cut month-end report generation time.
- Drove sprint planning and peer code reviews enforced standards keeping production at zero critical bugs post-deployment.

PROJECTS

Arkalyn-Kitty — Group Expense Manager SaaS

React · Node.js · Express · TypeScript · MongoDB · Razorpay

[arkalynkitty-fin.vercel.app](#)

- Built payment infrastructure with Razorpay HMAC webhook verification and idempotent locks handles concurrent financial operations without race conditions or double-charges.
- Implemented 3-tier RBAC (Member/Admin/Super Admin) with middleware route guards and proportional refund logic blocks privilege escalation and unauthorized access.
- Wrapped all financial mutations in MongoDB multi-document transactions guarantees balance consistency under concurrent load.

WorkZone - Task Management SaaS

React · Node.js · Express · MongoDB · RTK Query · JWT · AI API (Groq)

[workzone-todo.vercel.app](#)

- Implemented JWT auth with HttpOnly cookies and rotating refresh tokens (reuse detection) mitigates XSS token theft; supports 3 concurrent devices with per-device logout.
- Integrated Groq API with prompt-guarded inputs as a separate service layer converts natural-language input into structured task plans in one step.

CERTIFICATION & EDUCATION

MERN Stack Developer

Accord Academy

Jun 2024 – Jan 2025 | Chennai, TN

B.E - Electrical and Electronics Engineering

Builders Engineering College

2021 – 2025 | Tiruppur, TN.
