

ARAVIND A Full-Stack Developer (MERN)

✉ aravind.workzone@gmail.com ☎ +91 8122479301 📍 Tiruppur, India 🔗 aravind-mern.vercel.app
🐙 github.com/aravindworkzone 🔗 linkedin.com/in/aravind-a-dev

PROFESSIONAL SUMMARY

Self-taught MERN developer with 1+ year of production experience building and shipping full-stack systems end-to-end. Specialized in React, TypeScript, Node.js/Express, and MongoDB. Targeting mid-level full-stack in Chennai or Coimbatore.

SKILLS

Frontend: React.js | TypeScript | Redux Toolkit | RTK Query | JavaScript (ES6+) | Tailwind CSS | HTML5 | CSS3

Backend: Node.js | Express.js | TypeScript | REST APIs | JWT Authentication

Database: MongoDB | Mongoose | PostgreSQL | Oracle SQL

Tools: Git | GitHub | Vercel | Render | MongoDB Atlas | Postman | socket.io | i18next

PROFESSIONAL EXPERIENCE

Full Stack Developer

01/2025 – Present

AV7SCM (Chennai Silks)

Tiruppur, TN

- Built and maintained 20+ production React modules using Redux Toolkit for an internal ERP portal serving 500+ employees - owned full feature lifecycle from design to deployment with no rollbacks
- Migrated 10+ modules to RTK Query - eliminated redundant API calls and cut unnecessary re-renders across the portal
- Engineered a reusable UI component library adopted by 3 teams, cutting duplicate code by ~30% and reducing new feature delivery time by an estimated 2–3 days per sprint

PROJECTS

Arkalyn-Kitty — Group Expense Manager

Tech Stack: React, Node.js, Express.js, TypeScript, MongoDB, Mongoose, RTK Query, Tailwind CSS, Render, Vercel
arkalynkitty-fin.vercel.app

- Solo-architected and deployed a full-stack pooled expense platform (Node/Express/MongoDB/React) — supports group wallet contributions, real-time balance deduction, and multi-member sync across concurrent users via RESTful APIs
- Enforced immutable audit trail — no expense edits permitted, delete-and-recreate only, all amounts in paise — eliminating floating-point errors and preventing unauthorized data mutation across 15+ active users
- Implemented 3-tier RBAC (MEMBER / ADMIN / SUPER_ADMIN) with middleware - enforced route guards and proportional refund logic on group closure - fully covers privilege escalation and unauthorized access vectors
- Wrapped all financial mutations in MongoDB multi-document transactions to guarantee atomicity - ensures no partial writes or inconsistent balances under concurrent operations

WorkZone - Task Management SaaS

Tech Stack: React, Node.js, Express.js, MongoDB, Redux Toolkit, RTK Query, Tailwind CSS, JWT, Gemini API
workzone-todo.vercel.app

- Built a production MERN SaaS with modular architecture (separate auth, task, and AI service layers) deployed on Vercel + Render — handles full user lifecycle from registration to AI-assisted task planning
- Secured auth layer with HTTP-only JWT cookies and refresh token rotation - supports 3 concurrent device sessions with per-device logout, eliminating XSS token theft surface
- Integrated Gemini API with prompt-guarded inputs to auto-generate structured task breakdowns from user goals — reduces manual task entry from multi-step to a single natural language prompt

CERTIFICATION

MERN Stack Developer — Accord Academy, Chennai (2025)

EDUCATION

B.E - Electrical and Electronics Engineering

2021 – 2025

Builders Engineering College

Tiruppur, TN.
